

RUSTIBUS® CLEANING JET

The Rustibus® Cleaning Jet is specifically designed for cleaning cargo holds. The Rustibus® Cleaning Jet uses water and compressed air that delivers a powerful, compact jet of water capable of reaching 100 feet (30 meters). Light weight and easy to set up and use enables a one man operation. Fits easily down man holes. Its simplicity reduces hold cleaning time to a minimum, removing the need for additional equipment such as scaffolding and scrapers.

Long-life and low maintenance is ensured with the use of high quality non-corrosive materials.

Removes: Cargo residues, dirt and dust
Loose paint & rust patches

Weight: Gun: 6 kg / 13 lbs , Stand: 9 kg / 20 lbs

Air Pressure: 6.9 – 8.2 BAR / 100-120 psi
